2050

2004 Check-Up

How we were viewed

exclusive

self focused in our
communications and actions

elitist and blue blood

a conservation group preserving
land for preservation's sake

How we wanted to be viewed

inclusive and welcoming

relevant to our audiences' lives and
reflective of their needs and wants

approachable, warm, personable

the organization that enhances the
quality of life through the preservation
of the distinct character of
communities

Trustees 2017 Strategic Plan

March 2007

Our Vision: 2004

To save land. To save natural and cultural treasures in order to preserve quality of life in Massachusetts, for everyone, forever.

Our Vision: Today

Engage an extensive network of people to carry out land conservation and stewardship at the local, regional, and statewide level.

Trustees 2017

COVER STORY

COVER STORY

Call them the “Inconvenient Truth” generation, young adults of college age for whom melting glaciers, Al Gore’s Nobel Prize, and soaring oil prices have created an unprecedented awareness of environmental issues.

Least **WANTED**

Flowering stems

Basal leaves

Garlic mustard

Alliaria petiolata

Unwanted for: Infesting forested & open areas, displacing native plants, poisoning butterflies, reducing wildlife habitat

Plant Type: Biennial herb with a garlic odor, Basal rosettes occur 1st yr, plant flowers the 2nd yr, Native to Europe

What you can do:

- Hand pull early in the spring and remove
- Mow or cut several times through growing season to prevent flowering & seed production (seeds may survive for up to 5 yrs in the soil before sprouting)
- Prevent spread by not moving infested soil or fill

Apprehend this plant carefully, it may be mistaken for others!
